## The eMLi concept

eMLi is aimed to **enhance the productivity, increase the revenue** and **cut-off overheads** through a core ICT driven software system. **eMLi:com-net** will enable your University or Autonomous Institute to implement advanced student-oriented facilities such as **Online Admission, Online Resource Sharing** and Information **Kiosk** by automatically managed Self Service Portals.

eMLi will provide a great communication **bridge between University and Affiliated Institutes** where the data collection part will automatically be eliminated. On the other hand, Affiliated Institutes will be having a data sharing environment where they need not to work separately to generate, compile and produce the required data in a specific format given time-by-time by University.

Developed by **more than 11 year experienced company**, eMLi and eMLi:com-net is working in production at various places in India and abroad and producing extraordinary outputs.
